

FLEXSYS HOSTED DESKTOP

Flexsys Cloud hosted desktop offers customers a “virtual desktop” containing all of your familiar business software applications accessed, your PC is available anywhere from any computer. You can login over the internet and access it from wherever you are – it has YOUR applications, email and documents. You can easily share files and collaborate on them with colleagues just as if you were sharing

an office server. Plus with Flexsys, there's no capital expenditure, just a monthly fee.

Access to data, email, software applications and peripherals is no different from what you normally experience everyday while working at your desk. All of your data, email and software applications are hosted on our secure cloud network.

WHY USE A HOSTED DESKTOP SOLUTION?

Flexsys Hosted desktop has many advantages over the traditional way of working. Our desktop model lets you easily customise your working environment with a full range of software applications that are available on demand. You will be able to access your desktop securely from anywhere in the world that has an internet connection.

You can use your existing desktop PCs or laptops with our hosted network or you can use a specialised device called a Thin Client. A Thin Client is a cost

effective alternative to a traditional Pc and an increasing amount of businesses are turning to this form of hardware in order to save money while improving their IT network. Contact us to find out more.

Save Money!

By implementing a Flexsys Hosted Desktop Your business can experience an immediate reduction in capital costs. Save Money on hardware, software and improve your carbon footprint at the same time.
