

FLEXSYS HOSTED EXCHANGE

Flexsys recently became one of the first UK providers to be approved by Microsoft to rollout the latest version of Microsoft Exchange 2010 onto our UK based hosting platform.

Flexsys Hosted Exchange is a secure, scalable and cost effective alternative to buying and installing your own email system. It removes the complexities of managing an enterprise class

**FLEXSYS HOSTED EXCHANGE
REQUIRES NO UPFRONT COST;
HARDWARE OR SOFTWARE
LICENSES OR IMPLEMENTATION**

email system with guaranteed service availability, has all the functionality of a traditional in-house Email Server

such as sharing of contacts and calendars without the overhead and capital investment.

Flexsys Hosted Exchange can be used in conjunction with Flexsys Hosted Desktop or alternatively as a standalone service. Either way, Flexsys hosted Exchange is hosted within accredited data centres with all data being backed up daily off-site to a secondary data centre, ensuring that your email data is safe and secure and there is no possibility of data loss.

Flexsys Hosted exchange requires no upfront cost; hardware, software licenses or implementation we just a simple monthly rental per user. Choose from a range of Exchange options to exactly match your needs.
